

## Wear headphones accordingly

Controls are always on the right side.

### 1. To charge the headphone

To charge the headphones, connect the USB cable to a USB power source. The light indicator is red when charging. Charge for 3 hours and once done, the red indicator light will be turned off.

### 2. Turn On the headphone

Press and hold the square button for 5 seconds to turn the headphone on.

### 3. To connect the headphone to your device....

Press and hold the ON button of your headphone until the RED and BLUE light flashes. Go to your handset's Bluetooth settings, turn it on and connect to dBs-Live. Or if you have a device that does not support Bluetooth but you still want to use the headphones, plug in the 3.5mm jack

### 4. Answering Calls

To answer calls, press the "square" button - the same button is also used to end a call.

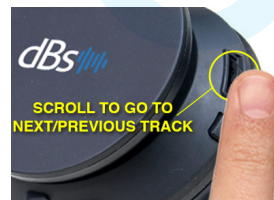

### 5. To Play or Pause Music

To play or pause music, press the "square" button. The music will automatically be paused if an incoming call is received in the middle of listening to music and will resume once the call is ended.

### 6. Playing the next track

To play the next/previous track, slide the "slider" button up for previous or slide it down for the next track.

### 7. Adjusting the volume

To increase the volume up, slide the "slider" button up for 3 seconds or slide it down for 3 seconds to decrease volume. Once it has reached the maximum volume, a "beep" sound will be heard as well as when the minimum volume has been reached.

Now you are ready for the dBs Experience!
